

Accident Analysis in the “Hauts-de-Seine” department

Coursera: **Applied Data Science Capstone**

Philippe RAMEIX

Evolution and Geographical distribution of the accidents

Evolution Between 2006 and 2017

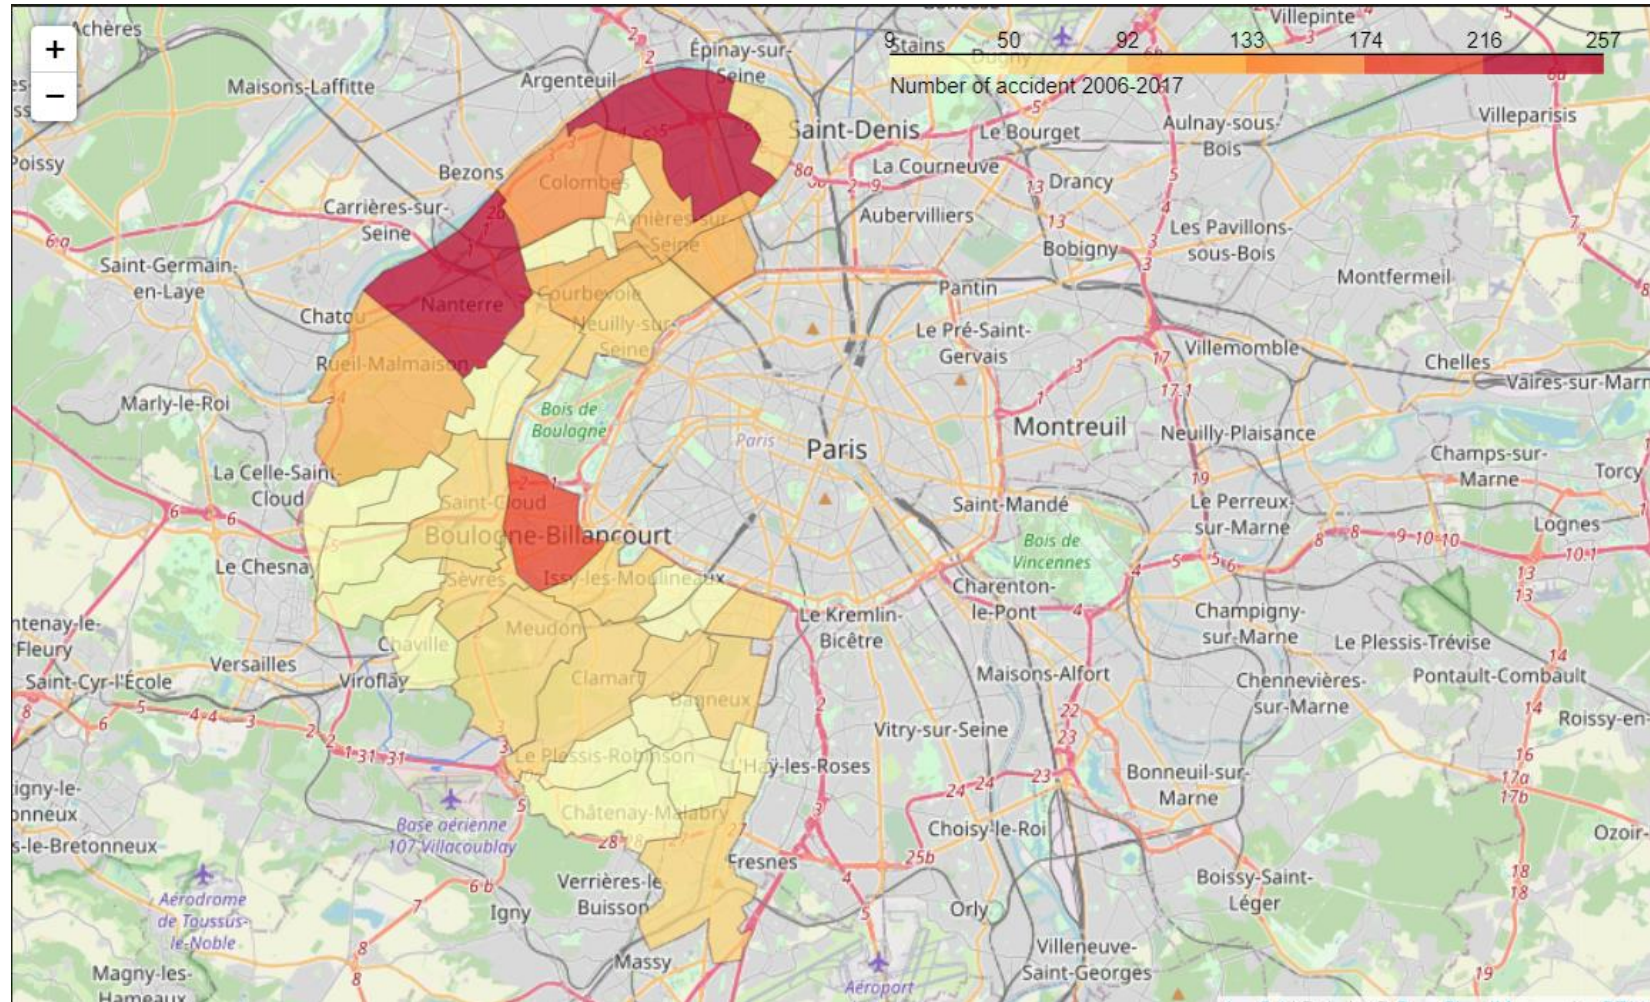

Evolution Between 2006 and 2017 by Town

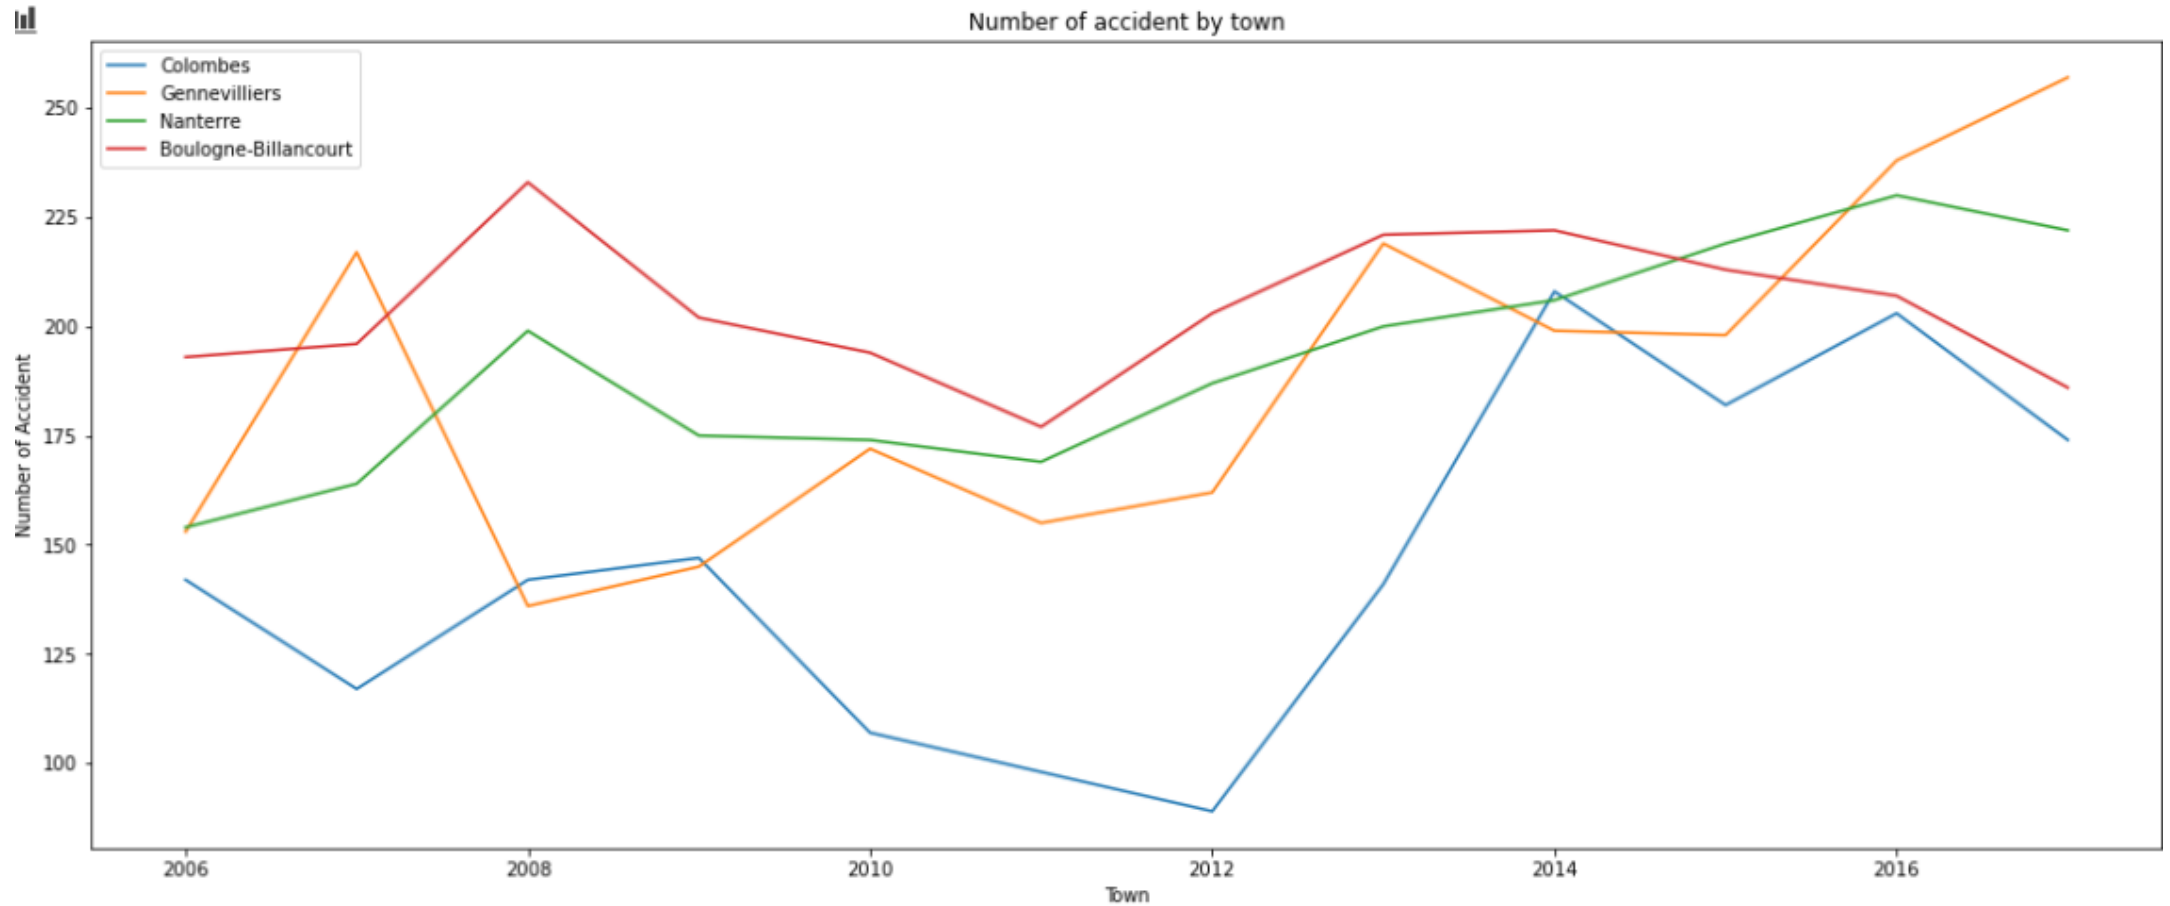

Situation in 2017

Choropleth map for 2017

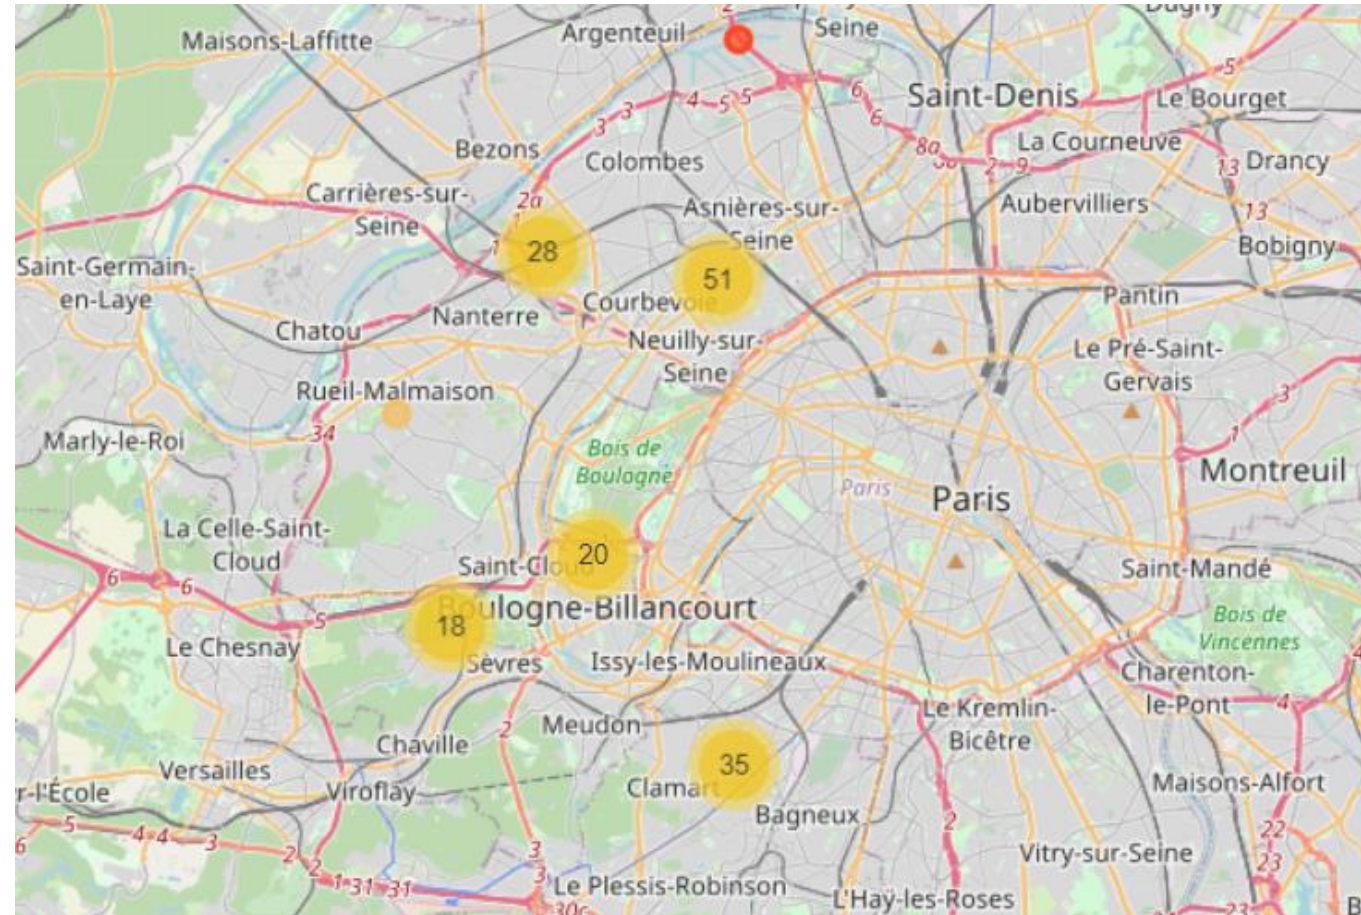

Evolution for the top 4 cities

K-Means Clustering

- two clustering analysis using the K-Means algorithm
 - with the columns describing: the number of vehicles, day/night, the severity of the accident, the types of vehicles involved, the drunk state and the type of collision.
 - Another one, simpler, without the type collision
